BHUMIKA SHUKLA

UX DESIGN INTERN | PRODUCT DESIGN | INTERACTION DESIGN

Bilaspur, Chhattisgarh, India | +91-9039737715 | beforebhumika@gmail.com | LinkedIn | GitHub | Portfolio

EDUCATION

Chouksey Engineering College | B.Tech, Computer Science and Engineering | Expected May 2028 | CGPA: 9.1 / 10.0
Relevant Coursework: Human-Computer Interaction, Software Engineering, Web Development, Data Structures and Algorithms

UX DESIGN PROJECTS

Mobile Caption Controls – YouTube UX Concept | *Figma, User Research, Interaction Design, Accessibility, Prototyping*

- Evaluated the mobile video-watching experience with 6 participants, identifying caption discoverability and playback-control navigation as key usability challenges
- Found that 4 of 6 participants struggled to locate caption settings in the first test; redesigned the control flow to make caption access more discoverable without interrupting playback
- Created 3 user flows, 8 low-fidelity wireframes, and a high-fidelity interactive prototype covering caption activation, styling, and playback states
- Ran a second usability round in which all 6 participants located the caption controls, compared with 2 of 6 in the initial round
- Annotated accessibility decisions covering text contrast, touch targets, caption readability, screen-reader labels, and interaction feedback
- Rejected a dedicated caption-settings screen in favor of a more direct player-level interaction to reduce navigation effort and preserve viewing continuity

Design-to-Development Handoff | *Figma, HTML, CSS, JavaScript, GitHub*

- Documented 12 component states (default, active, disabled, loading, error) to clarify expected interface behavior
- Specified responsive behavior at 3 viewport widths and documented spacing, typography, and interaction requirements for developer handoff
- Built a small interactive prototype demonstrating caption-toggle behavior and immediate visual feedback, connecting design decisions with implementation feasibility

Creator Studio – Analytics Dashboard Redesign | *Figma, Information Architecture, Data Visualization, Responsive Design*

- Redesigned a creator analytics dashboard around 3 key tasks: reviewing video performance, comparing engagement, and identifying content trends
- Created 10 high-fidelity screens and a reusable set of 8 UI components for consistent dashboard interactions
- Designed loading, empty, error, and populated states to communicate system status and support predictable navigation
- Compared 2 layout directions and selected the final concept based on information hierarchy, readability, and implementation simplicity

EXPERIENCE

DSA & Programming Instructor, AISECT Academy | Feb 2026 – Present

- Explain complex technical concepts through structured examples, adapting explanations for learners with different experience levels
- Guide students through programming exercises and projects, using feedback to identify misunderstandings and clarify difficult concepts
- Break complex workflows into manageable steps, strengthening communication and collaborative problem-solving

SKILLS

UX Design: User flows, wireframing, interaction design, prototyping, information architecture, usability testing
Accessibility: Contrast evaluation, touch-target sizing, caption readability, screen-reader labeling, inclusive interaction patterns
Research: User interviews, qualitative synthesis, pain-point analysis, usability evaluation
Visual & Interaction Design: Typography, layout, visual hierarchy, responsive design, reusable components, interaction states, motion prototyping
Tools & Technical: Figma, FigJam, HTML, CSS, JavaScript, Python, Git, GitHub

ACHIEVEMENTS

- **Google Big Code 2026, Finalist**
- **Winner, Amity University Inter-College Hackathon** (100+ teams)
- LeetCode Guardian | Codeforces Expert
